Re: Palm Drive Trailer Park Maintenance and "Rules and Regulations"

Dear Ms. Weston:

I have been out of town after I delivered my letter dated September 5, 2006 to the Palm Drive Trailer Park resident manager. Therefore, this is my first opportunity to respond to your letter dated September 7, 2006, which alleged to respond to mine but covered other things.

Our first response concerns your claim that by removing oleanders in early May, we caused a pipe to surface and leak after late August, when we were gone the entire month. What you are claiming is a chain of causation I have great difficulty comprehending. Did gremlins drive over the pipe in August to move the earth, or what? Maybe alien beings swept away dirt on their way to the Integratron in Joshua Tree? Or angel wings? My letter said when I parked my car in early September after being gone the month of August, for the first time I saw a pipe. Unlike you--and apparently Mr. Vide from whom you get information you then state as though you had personal knowledge--I drove over that area every day I was here and walked over it several times a day, after we removed the oleanders in early May. Earth covered whatever was there. Then we were gone a month, so did not move any earth. When we came back, a pipe was visible for several feet, not just inches I drove over. That night for the first time I saw it had leaked. It is clearly ludicrous to say we could have caused that. In any event, we do not care what caused it and will be happy to fix it even if someone else did, if the repair is simple. However, given the ridiculous way we have been treated here, including being blamed for things we could never have caused, which you are now continuing, I wanted to make it clear we did not cause that leak. I still believe it is obvious we did not do so.

Secondly, if there are fire extinguishers here, why did neither the manager nor Mr. Vide get one and put out the flames when there was an electrical fire above his wooden storage building built to the property line abutting ours? I was screaming fire and saying someone get a fire extinguisher, but everyone just stood there. Twenty minutes later, the fire department arrived, and fortunately the fire had burned itself out. Fire extinguishers may be somewhere, although I have never seen any, but responsible parties did not use them when there was a fire here. We have what we need to take care of fire inside our house, and the fire danger in mobile homes is one reason all enclosed ancillary structures must be made of certain

materials if coverings cannot be removed quickly with just hands, which is one way I know Mr. Vide allowed illegal enclosures without permits. However, when I saw flames above a wooden building and two responsible managers did nothing, it reinforced my belief based on seeing dry brush left around for over a year, that the Park owners care little to protect the outside of our house from fire. Apparently they are too busy minding our business.

Thirdly, in response to your going on to cover other subjects not mentioned in my letter of September 5, 2006, I am not going to educate another group of people Mr. Vide employs without telling them the whole story. Get a copy made of the court file in Case INC 059358 from the Superior Court in Indio. Get a copy of our responses to Mr. Vide's attorneys' interrogatories in that case. Read correspondence between us and everyone representing him since March 2006. Look at the drawings and written documentation of our plans for our house, which I gave Mr. Vide in 2005 and he approved, if we could get permits to do it, which turned out not to be required. Educate yourself. In the meantime, do not presume to give us legal advice. We consider it more harassment, over a year of which led to the lawsuit.

Finally, I have forwarded a copy of your letter to the State Bar of California to investigate whether you are practicing law without a license. In connection therewith, Mr. Vide had law firms make the same claims your letter makes, that we did not comply with Park rules by following County requirements and the Uniform Building Code after Mr. Vide's statement when I turned in drawings and descriptions of the very materials you now say are not in compliance with Park rules, that I could "do whatever [I] want, if [I got] permits from the County." Apparently Mr. Vide believed I would be intimidated and not go to the County, since other people here have illegal room enclosures they could never have gotten permits for if he had told them that. Instead, I found out what we had to do to comply with the law, and we did it. He harassed us constantly once we began work. The two law firms sounded just as silly as your letter claiming Park rules about hanging drying clothes and bathing suits cover constructing not fully enclosed semi-permanent buffer zones against extreme summer heat and cold winter winds here, in compliance with prior approval and County law requiring materials in such zones to be removable with just hands, with no tools. Now Mr. Vide hires property managers to make the same claims law firms had to abandon when faced with facts and the law. Like Mr. Vide, you mistake what you are dealing with here. Your letter helps him harass us in violation of our construction approval, our statutory right to quiet enjoyment, and our constitutional rights to liberty and privacy, among other rights. If you continue, you will thereby expose yourself and your firm to more consequences.

Very truly yours,
Brenda Barnes and Peter Naughton
